User Guide – What you need to know

What is included in your purchase

- 1 HannahEA – Lifetime license under your name .
- UNIQUE configurations for several pairs
- Template file to load indicators and trade manually

How HannahEA Works?

HannahEA has a solid strategy based on:

- **Order Blocks:**

"An Order Block is a technical analysis technique that tracks the accumulation of orders (when bullish) and distribution of orders (when bearish) of banks and institutional traders, such as Central banks. "

This technique has proven to be extremely reliable, being one of the most secure ways of trading at the moment. When using it, patience is great skill.

- **Regression and Volatility:** Linear regression channels are quite useful technical analysis charting tools. In addition to identifying trends and trend direction, the use of standard deviation gives traders ideas as to when prices are becoming overbought or oversold relative to the long term trend. HannahEA use them to constantly monitor the area on which price is on.
- **Strong focus on Money Management:** Excellent features that help you in an automatic way to secure your profit without putting in risk your capital. Some of them are: Trailing Stop, Trading time, Time between trades, trading on Fridays, Limit number of trades, random TP setting and the most important one, **NO MARTINGALE, EVERY TRADE IS A SINGLE SHOT WITH TP AND SL**

HannahEA analysis is triggered with every single tick, monitoring the price and where it stands based on the order block calculations. Determines if a Long or Short trade should be opened.

User Guide – What you need to know

Variable	Value
ab note2	HannahEA - Order Block & Regression EA
ab note5	___Trading Settings___
1/2 Tamaño lotes a operar	0.1
123 Magic number // Use it when same EA in pair in different ...	7770
123 Max number of orders	1
123 Time between new orders	15
123 BO condition	3
ab note3	1: ZigZag BO, 2: Highs/Lows BO, 3:None
123 Expiration time - If BO 1 or 2	H4
123 High/Low from N candles	6
Disable Hedging upon news?	true
Limit trading time? From - To	false
123 From. Local Hour	18
123 To. Local Hour	4
Trade on Fridays?	true

Lot size Hannah will use when opening the first trade. Default value: 0.1.

Magic Number- Make sure to use a UNIQUE random number for every instance of the EA. So if you attach it in 2 different charts, the magic number MUST be different

Maximum number of trades that HannaEA is allowed to open at the same time. Since we are monitoring tick by tick, Buy/Sell opportunities can happen more than once at the same time, meaning the Price is within the order block, therefore HannaEA could open more than 1 trade at the same time (NO MARTINGALE), like a Grid trading. **Default set to 1.**

We also added a waiting time between each new trade. If there was a trade open, and there is a buy/sell opportunity, it will wait X number of minutes to open a new one. If the Max number of orders is set to 1, this acts as a “cooling down” period, it won’t open a new trade until after those X minutes. Default is 15 minutes, if you want to set 1hour, put the minutes (60)

Trading options:

BO Condition: 1 – ZigZag, Will grab the last value of the ZigZag indicator and set a Buy or Sell (Limit/Stop)

BO Condition: 2 – Highs/Lows, Will calculate the last High/Low from N candles and set a Buy or Sell (Limit/Stop)

BO Condition: 3- None, if there is a buy/sell trade, it Will open it right away, to the market value. We recommend this one.

User Guide – What you need to know

Variable	Value
ab note2	HannahEA - Order Block & Regression EA
ab note5	____Trading Settings____
1/2 Tamaño lotes a operar	0.1
123 Magic number // Use it when same EA in pair in different ...	7770
123 Max number of orders	1
123 Time between new orders	15
123 BO condition	3
ab note3	1: ZigZag BO, 2: Highs/Lows BO, 3:None
123 Expiration time - If BO 1 or 2	H4
123 High/Low from N candles	6
Disable Hedging upon news?	true
Limit trading time? From - To	false
123 From.. Local Hour	18
123 To.. Local Hour	4
Trade on Fridays?	true

Use it to limit the time when HannahEA trades. Set the **From** and **To** in **your local time**, so for instance if you want Hannah to trade only from 18hs to 4AM, just set the From to 18 and To to 4.

Also, we added the option to disable trading on Fridays, set it up to True and Hannah won't open new trades on Fridays, however if there is any trade open, it won't close it.

User Guide – What you need to know

ab	note4	Win/Loss Settings
123	Ticks for TP	300
123	Ticks for SL	200

1/2	Regression	0.64

Configure the Takeprofit and SL, in ticks. However, this values are going to be modified automatically when loading the Set files provided.

Use of trailing stop, you can configure to the number of ticks and the stop. This feature enables you to collect small profits and keep trading. Oftenly used by experienced users. Our set files don't use Trailing stop, so use it at your discretion.

In case you want your trades to be closed with a random of X ticks after reaching breakeven level

If the DD reaches the specified % here, Hannah Will automatically close all the trades, assuming the losses.

Stop trading after N tardes won or lost. Default is 0, unlimited.

Specific settings related to Volatility and Regression channels. These are options to be configured by the Set file when loaded.

Important note: Only the TP, SL and Pair Settings Will be configured when loading the Set file, other options are for the user to be configured/modified at their own will.

Frequent Asked Questions (FAQ)

Minimum balance recommended

We recommend using Hannah with a minimum balance of 100 USD

Which pairs should I run on it?

We recommend starting with 2 pairs. One on each TF (15M and 1H). Any pair you use will be fine, the only recommendation we make is to try to diversify.

For example, if you use EURUSD then try to use Hannah in other pair distinct to EUR or USD, such as AUDJPY.

Why this? In order to avoid strictly correlation problems

What about the settings that the set file does not modify?

These options are meant for the user to use at their own suitability. Adding more controls to the MM side but always left for the user to play with them.

The user can obtain his/her own set files with these options configured by optimizing the ones that were provided.

Does HannahEA use martingale?

NO. The EA doesn't use martingale at all, every trade is a single shot, with a TP and SL set. In addition as explained, is possible to set Hannah work in a, likely, Grid mode.
