

SUPER COMMANDO FOREX

TUTORIAL

Created By: **William Talbert & Team**

Introduction

Super Commando Forex System is one of those systems that come one in a million. Our team has over 20 different styles of traders. All which are highly experienced. Super Commando Forex System has the ability to provide you with multiple sources of alerts. On-Chart, Audio Alert, E-mail Alert and more. There are several formulas built into this system for maximum accuracy. It is very easy to use and lucky for you, doesn't get any easier when you have "Buy Now" and "Sell Now" on your chart. For newbies this could be a dream come true. No knowledge of forex analyses is needed to use this system. It can suite any trading style and accommodate a beginner to an advanced level of experience with ease. The message is clear, when Super Commando Forex System finds a trading opportunity, it will show up on your chart and alert you. Enter right away when you are alerted!

System Requirements

Metatrader 4 platform with an internet connection. Metatrader can be downloaded FREE of charge. If you need to download it, visit your broker's website and download it. Almost all brokers use Metatrader as their platform.

Installation

The process of installing Super Commando Forex System is simple and easy. You will receive exactly 3 "EX4" files and 2 TPL files(templates). They will be the following:

- BeamSniper Combo
- SCF Beam
- SCF Sniper Confirmation

Templates

- Commando Forex Long-Term
- Commando Forex Short-Term

You will need to paste these EX4 files in the "Indicators" folder of your broker. Scroll up to **File > Open Data Folder > MQL4** and you will see the Indicators. Paste the 4 files there. Now go back, and click and open the Templates folder. Paste the TPL files there. Restart MT4.

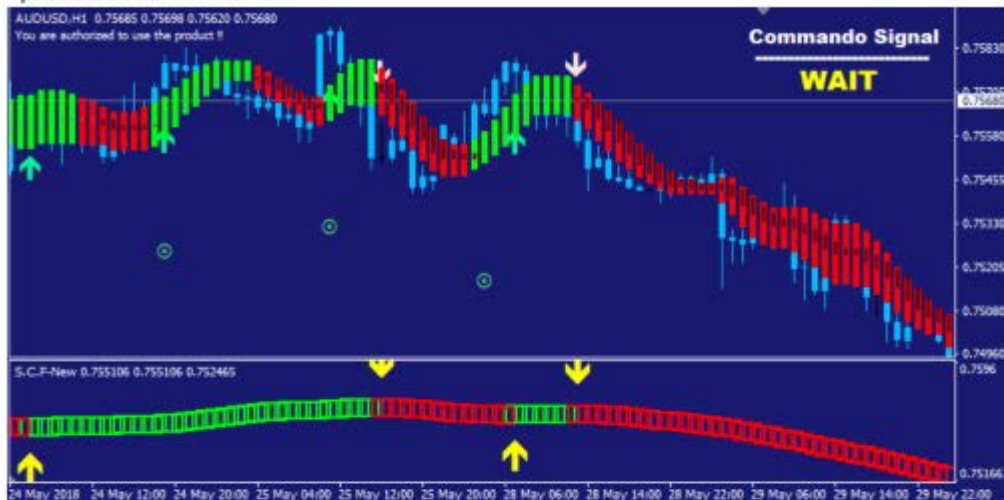

Loading Super Commando Forex System

Within Metatrader 4, scroll up to **Tools > Options > Expert Advisors**. Check to make sure that Allow DLL Imports is enabled.

Open any chart of your choice and load the Super Commando Forex System. Load the templates **only!** The optimal settings are built into the template so be sure to run them. If you are an advanced user you can change the parameters of the moving average however, it is strongly suggested to leave the settings as they are.

Scroll up to **Charts > Template > Load Template** and load the Long-Term or Short-Term template.

You will instantly see the Super Commando Forex System fully set on your chart. It will look like the picture below...

As you can see, this chart gives clear messages. Bearish or Bullish. The green is bullish and red is bearish. In a bullish market you look for buy trades and in a bearish market you look for sell trades.

When To Enter Trades

With Super Commando Forex System, you will receive On-Chart Alerts and Audio Alerts. You enter as soon as you either see a Sell Now or Buy Now. An arrow will show on the candle where you need to enter the trade as well. The arrow can be considered an alert too.

Buy Trade

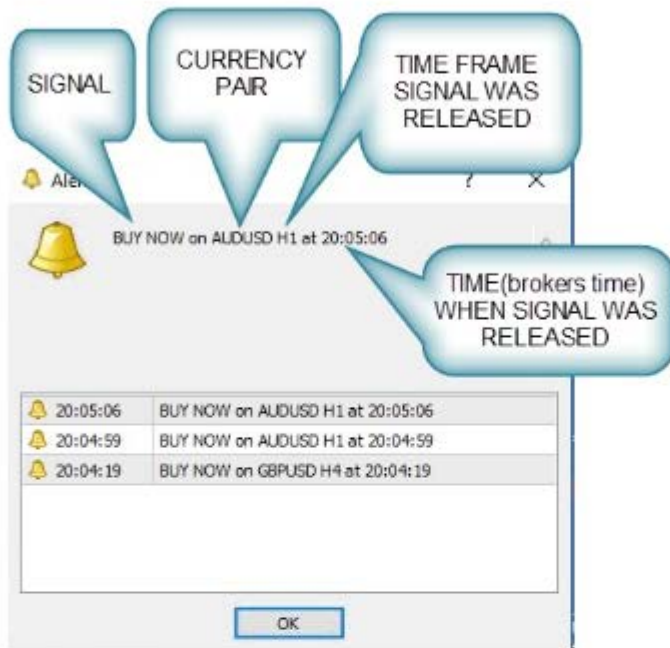

A Buy trade will be easy to spot since the message will be right there on the top right of your chart. It will say **"BUY NOW"**. Notice that the yellow arrow on the SCF Window below which confirms the signal. This is when you would enter a Buy trade immediately.

Sell Trade

Just like the Buy Trade, a sell signal will also show a message saying **"SELL NOW"**. A red arrow will show which means you must enter a sell trade. A yellow arrow should also show up which would confirm the signal. This is when you would enter a Sell trade immediately.

The Alerts

How To Enable Alerts

Go into the settings of BeamSniperCombo. And make sure that alertsON is set to TRUE.

Selecting The Template That Suits You

For time frames **M30** and below, use Commando Forex Short-Term.TPL

For time frames **H1** and above, use Commando Forex Long-Term.TPL
