-Restart your MT4

- Open your favourite chart. Press the right mouse button and pick VMFX template.

VMFX-SW - is the safest one. The risk is small, entries are a bit slower but they are more filtered than other signals. Pick this template if you expect smaller, but more sure profits.

VMFX-DT is the most balanced template. Risk is higher, entries are faster than previous template, but still at safe/medium risk level. This mode is ideal for typical daytrading.

VMFX-SC- Is the fastest template. It provides the faster signals with increased risk. Pick this one only if you are experienced trader, or when you have spent sufficient time with the trading system.

VMFX-ADVSC- is a special mode for catching top and bottoms of any trend (even those smaller ones on M1 timeframe), it does not provide extra filtering with the bottom trend indicator.

System overview

System contains four indicators

- 1.Entry/Exit Indicator (Blue/Red boxes).
- 2.Analysis Dashboard located in the upper right corner).
- 3.Fast Pair changer (bottom right corner).
- 4.Additional trend filtering (bottom of the chart).

ENTRY EXAMPLE (BUY SIGNAL)

Entries are very easy to spot. Blue boxes should be paired with the blue bottom trend indicator.

When both indicators are in agreement BUY signals are fully confirmed.

ENTRY EXAMPLE (SELL SIGNAL)

Sell signals are pretty much the same, we have just different colors to match. Every red box paired with the red trend bottom indicator is a valid sell signal.

STOP LOSS AND TAKE PROFIT

Stop loss order should be placed below (buy signal) or above (sell signal) the entry box.

Take profit can be realized at $RR=1:1$ (TP1) or $RR=1:2$ (TP2)

SPECIAL TOP AND BOTTOMS MODE

System contains also very fast template without the confirmation of the bottom indicator (template: VMFX-ADVSC).

This mode is more aggressive than any other templates, but it can also provide the highest profits. Please make sure to secure your orders fast when trading with this mode.

RANGING MARKET

When you also see no clear direction on the market (constant changing of the bottom trend confirmation indicator}, you can also use special top and bottoms mode (template: VMFX-AOVSC).
