Get your

How? Open your Metatrader 4 platform and from the top bar > File > Open data folder > MQL4 > Indicators (copy here)

Installing the template:

Copy the "Forex Trend Sniper Dominator.tpl" template in the MT4 templates folder.

How? Open your Metatrader 4 platform and from the top bar > File > Open data folder > Templates (copy here)

Now close and re-start your Metatrader 4 platform.

Getting Started

Open any chart and attach the Forex Trend Sniper Dominator template to that chart.

How? Right click in the chart > Template > select the Forex Trend Sniper Dominator template

The chart with the template attached should look like this:

Installation FAQ (Please Read)

1. How do I check if I have installed all 3 trading indicators correctly?

They'll need to appear in the indicator's list after attaching the Forex Trend Sniper Dominator template to the chart (see image below).

Right click in the chart > indicators list (check here)

2. How do I add more currency pairs to the Forex Trend Sniper Dominator Analyzer?

This is a very simple process.

You will need to add or remove them by accessing the Forex Trend Sniper Dominator Analyzer inputs tab.

Proceed as follows: right click in the chart > indicators list > edit the Forex Trend Sniper Dominator Analyzer and go to the inputs tab.

Add or remove pairs by editing the symbols list. Then press OK to save the new configuration.

You should see this:

Custom Indicator - Forex Trend Sniper Dominator Analyzer

Variable	Value	
ab) Symbols	USDJPY,EURUSD,GBPUSD,NZDUSD,AUDUSD,USDCHF,USDCAD,EU

For instance, when your broker displays the EURUSD as EURUSDi, add it exactly like this in the symbols list.

If they don't match, the Analyzer remains blank.

Setting up the Forex Trend Sniper Dominator signal alerts

The system comes with onscreen, email and push alerts.

You'll need to enable the alerts you need from the indicator's inputs tab.

How? Right click in the chart and press the indicators list.

You'll see the indicators, Forex Trend Sniper Dominator Analyzer and Forex Trend Sniper Dominator Signal.

Select one indicator at the time and then press "edit".

Then go to the "Inputs" tab to modify its alerts and some other input parameters (if you like to experiment with this).

You can enable/disable alerts.

Finally press the "OK" button to save your preferences.

Here's a great video on how to set MT4 push & email alerts:

Forex Trend Sniper Dominator Software Usage

Forex Trend Sniper Dominator works on any timeframe from M1 up to the monthly.

For scalping purposes, use the M1 and M5 trading charts.

For day trading, use the M5, M15 and M30 charts.

For swing trading, I recommend using the H1, H4 and D1 trading charts.

Buy And Sell Forex Trend Sniper Dominator Trading Rules

1. BUY Signal

- Open a BUY trade when a BLUE square appears on the chart AND the Analyzer Dashboard is colored BLUE as well.
- Place a stop loss below the previous swing low price.
- Ignore any RED square signal when the Analyzer Dashboard is colored BLUE. In this case, RED squares are only used to close open buy trades.

It's that easy!

Here's a buy trade example: looking at the EURUSD H1 chart below, both colors are BLUE (square + Analyzer Dashboard), so we open a BUY trade!

Exit the buy trade (3 options):

- Exit the trade for a fixed profit target*
- Close the trade when a RED square appears on the chart.
- Exit the trade near the previous swing high level (resistance)

*About the fixed profit target: The vast majority of traders prefer to go for a fixed profit target. It's simple and you don't need to calculate anything.

Below you will find some typical take profit targets for the different time frames:

M1 chart: Aim for 10-25 pips M5 chart: Aim for 20-35 pips M15 chart: Aim for 25 -40 pips M30 chart: Aim for 30-75 pips H1 chart: Aim for 50-120 pips H4 chart: Aim for 80-200 pips D1 chart: Aim for 125-300 pips

2. SELL Signal

- Open a SELL trade when a RED square appears on the chart AND the Analyzer Dashboard is colored RED as well.
- Place a stop loss above the previous swing high price.
- Ignore any BLUE square signal when the Analyzer Dashboard is colored RED. In this case, BLUE squares are only used to close open sell trades.

It's that easy!

Here's a sell trade example: looking at the GBPAUD M1 chart below, both colors are RED (square + Analyzer Dashboard), so we open a SELL trade!

Exit the sell trade (3 options)

- Exit the trade for a fixed profit target*
- Close the trade when a BLUE square appears on the chart.
- Exit the trade near the previous swing low level (support)

*About the fixed profit target: The vast majority of traders prefer to go for a fixed profit target. It's simple and you don't need to calculate anything.

Below you will find some typical take profit targets for the different time frames:

M1 chart: Aim for 10-25 pips M5 chart: Aim for 20-35 pips M15 chart: Aim for 25 -40 pips M30 chart: Aim for 30-75 pips H1 chart: Aim for 50-120 pips H4 chart: Aim for 80-200 pips D1 chart: Aim for 125-300 pips

3. Neutral trend or range-bound price action

In this case, ignore all buy and sell square signals on the chart until a trend forms again, either up or down.

You can stick with your current open position, if any.

More Trading Examples

That's it, trade profitable with the Forex Trend Sniper Dominator system.

Please use on a demo account first to make yourself familiar with the Forex Trend Sniper Dominator system.

Thank you!
